Encouraging Articles for Girl Students

To start publishing article on 'Women in Accountancy' is very good idea, especially for girl students. Considering present scenario in India, due to social commitment and early marriage, sometimes they unable to complete the prestigious Chartered Accountancy course. Such articles will push up their moral to become a Chartered

Accountant, a qualification which will give them high stature in the society.

Rajya Sabha Debate

I went through the Rajya Sabha debate on the CA (Amendment) Bill, 2005, published in the January 2007 issue of the Journal. Most of the Rajya Sabha Members

have spoken very high of the Chartered Accountants and the role played by them as well as the ICAI. I was really elated in going through the same and I am really proud of being a CA. I thank you for publishing the extracts of the debate.

Valuable Thoughts

My son is a C.A. and we get your monthly Journal 'The Chartered Accountant' regularly. I was very much touched by the meaningful contents of 'President's Page'. ICAI President's valuable thoughts on how to make life happier & meaningful are simply wonderful and unforgettable. My sincere thanks & heartiest congrats to him, for sharing such extremely useful ideas like "*sharing knowledge is Dharma and one must consciously practice it*", in today's times of changes/challenges.

- Prof. S.D. Natu, Mumbai

Commendable Efforts

Institute's efforts are really commendable in changing the look & developing the presentation style of the Journal. Further, it is appreciable that journal reaches on the very

first day in the hands of readers. In my opinion, Institute should also include some articles, guidance statements, phrases & tips to motivate the CA. students.

Power of Information

Today Indian CAs are making their mark globally in every field, be it accounts, audit, tax, financial management, IT, BPOs, Risk management, WTO or even software. But it is information that makes us tick. This is a knowledge-era and the power of information should be utilised to the limit. This means being aware, reasonably familiar and up-to-date with the happenings within the economy, professional pronouncements, legal provisions, circulars, standards and Institute's guidelines, ready access to knowledge repositories, greater operational comfort levels with modern IT infrastructure and a pro-active mind. We must strive to be the thought leaders of the economy, by harnessing cutting-edge technology and the power of information and knowledge. This dual focus will ensure continued professional development, open up new vistas of opportunities, value addition to the nation, economy, justify our exalted place and herald the saga of even more successes in the years to come.
